

go green pledge

We Recognise:

- Climate change is one of the biggest challenges facing the world today. To avoid dangerous climate change we must reduce UK carbon emissions by at least 80% by 2050. To achieve this cut every sector of the economy must push forward the carbon cutting agenda.
- The education sector has a key role to play in addressing this challenge. Teaching and learning are crucial to inspire and educate the next generation of decision makers, business leaders and citizens, and equip them with the skills and knowledge to deal with the challenges of climate change.

We Pledge:

- That this institution will play its part to help stop climate chaos.
- That this institution will Go Green by working to reduce its carbon footprint.
- That we will work with students and staff to develop a whole school/college approach to continual improvements in environmental performance.

Signed:

Name:

Position:

On behalf of:
(Name of school/college)

student action on world poverty and the environment

School/College Details
