

Pledge 2010

We Recognise that:

- Climate change is the one of the biggest threats to the world and young people today. Avoiding dangerous climate change will require rapid and ambitious action to cut carbon dioxide emissions across all sectors of the UK economy. The education sector has a major role to play in cutting its own carbon emissions and leading the way towards a low-carbon future.
- Students across the UK are already taking action to fight climate change and need their educational institutions to support them and set a good example.

We Pledge:

- To reduce our carbon footprint by 10% in 2010.
- To join the 10:10 campaign as a public declaration of our commitment.
- To support the Go Green campaign and student-led initiatives to reduce carbon emissions in our institution.
- To engage students and staff in developing a strategy for achieving our 10% cuts and continual improvements in environmental performance.
