How Can We Create Low CO₂ Universities?

1-5pm, Friday 26th March
University of Edinburgh
60 Pleasance, Edinburgh [EH8 9TJ](#)

*Sandwich tea will be provided afterwards.
Full travel bursaries available.*

Right now, pollution is **changing our climate** and **cheap oil** is running out. How can students and staff work together to make our Universities **fit for the future?**

Workshops and discussion about practical projects to create low-CO₂ Universities.

- Hear from people running empowering projects rethinking our **energy, travel, food, and services**.
- Influence your University's **carbon management plan**, with Andrew Taylor from People & Planet UK.
- **Where does CO₂ come from** in a University population? With Ric Lander from Transition Edinburgh University.
- Volunteer **home energy audits**, with Ruth Bush from NUS Scotland's Student Footprints Project.
- How to **get funding** for your projects, on and off-campus.
- Building on exciting schemes and networks to **support and spread action**.

Further contributions would be extremely welcome. If you're interesting in attending, please email ric@transitionedinburghuni.org.uk or Ruth.Bush@nus-scotland.org.uk.

More information will be available online at www.peopleandplanet.org/goinggreener from 11th March.
