student action on world poverty and the environment

GO GREEN WEEK 2018

Every year Environmental Managers, Sustainability Departments and committed staff at UK universities contribute to the success of Go Green Week.

It is a great opportunity to engage students in issues of sustainability, climate change and encourage positive changes on campus and in students' and staff's lives.

In 2018, from February 12th-16th, People & Planet are partnering with National Union of Students (NUS) and 350.org to organise a series of events for universities to host as part of their Go Green Week 2018 programs.

Join us to learn about the stories of those most affected by climate change around the world; about the links between banks, global

finance and environmental crisis; and effective solidarity with those enduring climate change's harms, and leading on proposing positive solutions.

Universities organising Go Green Week 2018 events can sign up here to receive social media content and posters to promote your events.

FILM SCREENING

JOIN US FOR THE LAUNCH OF GO GREEN WEEK OR HOST YOUR OWN FILM SCREENING

If you are based in London, promote an exclusive screening of the film *To the Ends of the Earth*, featuring special guests from the film's production. It will be shown at SOAS with in co laboration with SOAS Fossil Free Finance society, 350.org, NUS and Greenpeace.

[Brunei Gallery Lecture Theatre, SOAS, Monday 12th February 2018. Free entry.]

If not London-based, the producers of the film are offering a discounted license fee of £125 for the first 15 smaller screenings around the country, exclusively for Go Green Week.

Get in touch with us at fossilfree@peopleandplanet.org to book your discounted screening.

TO THE ENDS OF THE EARTH: SYNOPSIS

To The Ends Of The Earth, follows concerned citizens living at the frontiers of extreme oil and gas extraction, bearing witness to a global crossroads. They call for human ingenuity to rebuild society at the end of the fossil fuel era. The people we meet are uniquely positioned to watch this global crossroads unfold. The film brings forward the voices of those who not only denounce the rise of extreme energy, but also envision the new world that is taking shape in its stead: a future beyond the resource pyramid, a post-growth economy.
